Dr. Leland J. Haworth
Director
National Science Foundation
Washington, D. C. 20550

Dear Dr. Haworth:

I would like to express my appreciation for the outstanding report in the Federal Funds series which you so kindly forwarded to us recently. As with previous issues published by the National Science Foundation, this document provided basic information which has proved helpful in the formation of management decisions on Research and Development programs and in serving as an essential reference document for our intelligence analysts to make comparative evaluations of other scientifically and technically mature countries.

The broadened coverage given to successive Federal Funds Reports has enhanced their value immeasurably so that I hope we may be the recipients of subsequent studies as they become available.

Sincerely,

Richard Helms
Director
